

Release Notes and description: Desktop Manager Hook 2.7b1

Release date: 14th February 2011

Release Notes :

- Notes.ini Clean-up algorithm enhancement
- Make optional the clean-up feature by adding the line "DskMgrHookCleanup=0"
- BugFix for the Background Synchronization process
- New monitoring feature of the DIRECTORY line > line "DirectoryBackup" added into notes.ini

Description of the DIRECTORY monitoring line :

The Desktop Manager Hook 2.7b1 is able to monitor the directory line of user's notes.ini.

On the first use of the new hook version, it will create a new line underneath the original Directory line, like :

[Notes]

KitType=1

Directory=c:\Program Files\Lotus\Notes852\Data

DirectoryBackup=c:\Program Files\Lotus\Notes852\Data

Note: The "DirectoryBackup" line is created only if there is an available names.nsf database in the original Directory path.

When enabling the Hook Debug feature (line DskMgrHookDebug), you could see from the log file the following :

```
2011/02/11 18:33:30 [05] (John Coutel) #####
2011/02/11 18:33:30 [05] (John Coutel) ###          Desktop Manager Hook DLL v 2.7b+      ###
2011/02/11 18:33:30 [05] (John Coutel) #####
2011/02/11 18:33:30 [05] (John Coutel)
2011/02/11 18:33:30 [05] (John Coutel) - Clear Notes.ini file content
2011/02/11 18:33:30 [05] (John Coutel)   o Update DirectoryBackup= line as : 'c:\Program Files\Lotus\Notes852\Data'
```

If the Directory line gets wrong (no names.nsf available on the path), on the next Notes restart, the Hook will automatically update the Directory line, like below :

```
2011/02/11 18:39:11 [77] () #####
2011/02/11 18:39:11 [77] () ###          Desktop Manager Hook DLL v 2.7b+      ###
2011/02/11 18:39:11 [77] () #####
2011/02/11 18:39:11 [77] ()
2011/02/11 18:39:11 [77] () - Clear Notes.ini file content
2011/02/11 18:39:11 [77] ()   o Wrong Directory= line : 'c:\Program Files\Lotus\Notes852'
2011/02/11 18:39:11 [77] ()     => Restore line as : 'c:\Program Files\Lotus\Notes852\Data'
2011/02/11 18:39:11 [78] ()     => Wrong Directory= line, Stop Notes client.
```

Description of the new option "DskMgrHookCleanup=0" :

When adding the line "DskMgrHookCleanup=0" on the user's Notes.ini, it will **disable** the following:

- Monitoring of the Directory line
- Notes.ini Clean-up feature
